Open the cap

Add water and screen wash additive to the recommended dilution

Fill it up until it reaches near the top of the filler neck

And close the cap

This is the radiator coolant filler cap
and maximum levels

Replace and tighten the cap

The dipstick is attached to the cap

The fluid level should be up to the MAX marker.

Refit the cap

Use a rag or paper towel to wipe the oil from the end of the dipstick

And withdraw the dipstick again

The oil should be between the minimum and maximum level on the dipstick marker, preferably nearer the maximum level

Refit the dipstick

Rotate it 90 degrees anticlockwise

And remove the oil filler cap

Pour in the oil a small amount at a time and keep checking the level on the dipstick

The oil will take a few minutes to settle down into the sump each time you pour it in

Refit the oil filler cap

Brake fluid reservoir

Unscrew the cap from the reservoir

If necessary, top the brake fluid up to just below the maximum level mark

Screw the cap back on
