John Deere offers a wide range of different engine options from air-cooled engines to liquid cooled gas to a liquid cooled diesel.

The X700 series has hydraulic lift for all your attachments so with the flip of a lever you can raise and lower your attachments, and there's a portal on the side you can plug in for a hydraulic angling.

Tilt steering comes standard on these machines and it's easy to adjust for your comfort.

Electric power take-off comes with a 12-volt outlet for plugging items in, so if you need to charge your phone or anything like you that, you can.

This hood design makes it easy to see your front attachments.

On the John Deere X700 series lawn and garden tractors the mower decks and all your attachments are optional, so you can pick the size tractor and then the size of the deck.

Again, John Deere offers a lot of different attachments but what's unique to the John Deere X700 series tractors is they have a quick hitch system.
